PENN Entertainment, Inc. Reports First Quarter Results

WYOMISSING, PA (May 8, 2025) - PENN Entertainment, Inc. ("PENN" or the "Company") (Nasdaq: PENN) today reported financial results for the quarter ended March 31, 2025.

Jay Snowden, Chief Executive Officer and President, said: "PENN's properties demonstrated strong resilience in the quarter following severe weather challenges earlier in the year, as gaming volumes rebounded in March and remained consistent through April and early May. In our Interactive segment we generated record gaming revenue and significant year-over-year improvements in both revenue and Adjusted EBITDA despite industry-wide unfavorable sports betting hold. Our corporate overhead costs were higher by approximately \$8 million in the quarter due to legal and advisory expenses. Through May 7, 2025 we have repurchased \$35 million of shares and remain committed to our previously stated goal to repurchase at least \$350 million of shares this year.

Resilient Core Business Trends

Property level highlights¹:

- Revenues of \$1.4 billion;
- Adjusted EBITDAR of \$457.0 million; and
- Adjusted EBITDAR margins of 33.1%.

"Portfolio-wide weather events in January and February negatively impacted Adjusted EBITDAR by at least \$10 million," said Mr. Snowden. "Core business trends were otherwise stable, particularly in markets not impacted by the continued growth of new supply. Our industry leading customer loyalty program, PENN Play™, combined with our investments in hospitality and entertainment offerings, contributed to strong engagement with our VIP and mid-worth customer segments. We are also seeing the benefits of our differentiated omni-channel strategy, as those pre-existing customers in Pennsylvania and Michigan who have engaged with our standalone Hollywood iCasino app have increased their spend meaningfully across both retail and online channels.

Record Online Gaming Revenue and Momentum Building

Interactive segment highlights:

- Revenues of \$290.1 million (including tax gross up of \$128.2 million); and
- Adjusted EBITDA loss of \$89.0 million.

"Our Interactive segment generated significant top and bottom-line year-over-year growth, highlighting the improved flow through we are seeing in the business. These results are despite customer-friendly sports betting outcomes that negatively impacted Adjusted EBITDA by approximately \$10 million in the quarter. Importantly, ESPN BET and theScore BET continue to provide a strong top of funnel for our

¹ Property level consists of retail operating segments which are composed of our Northeast, South, West, and Midwest reportable segments.

online casino platforms, which achieved record gaming revenue in the quarter and are contributing meaningfully to our results. Our online casino momentum is bolstered by the compelling early results of our standalone iCasino app in Pennsylvania and Michigan, which recently expanded into New Jersey and Ontario. Additionally, since the year began, we have rolled out several ESPN BET product enhancements and new features leveraging account linking, including adding ESPN favorites to the app homepage and creating a new rewards program. Throughout the year we plan to continue executing our strategy to provide a differentiated, personalized digital offering while also working to deliver on our performance goals,” concluded Mr. Snowden.

Share Repurchase Authorization Update

During the quarter ended March 31, 2025, the Company repurchased 1,413,882 shares of its common stock in open market transactions for \$25.0 million at an average price of \$17.67 per share under the December 2022 Authorization.

Non-GAAP Financial Measures

The Non-GAAP Financial Measures used in this press release include Adjusted EBITDA, Adjusted EBITDAR, Adjusted EBITDAR margin, Adjusted EPS, Traditional net debt, Traditional net leverage ratio, and Lease-adjusted net leverage ratio. These non-GAAP financial measures should not be considered a substitute for, nor superior to, financial results and measures determined or calculated in accordance with GAAP.

We define Adjusted EBITDA as earnings before interest expense, net, interest income, income taxes, depreciation and amortization, stock-based compensation, debt extinguishment charges, impairment losses, insurance recoveries, net of deductible charges, changes in the estimated fair value of our contingent purchase price obligations, gain or loss on disposal of assets, the difference between budget and actual expense for cash-settled stock-based awards, pre-opening expenses, loss on disposal of a business, non-cash gains/losses associated with REIT transactions, and other. Adjusted EBITDA is inclusive of income or loss from unconsolidated affiliates, with our share of non-operating items (such as interest expense, net, and depreciation and amortization) added back for our Kansas Entertainment, LLC joint venture. Adjusted EBITDA is inclusive of rent expense associated with our triple net operating leases with our REIT landlords. Although Adjusted EBITDA includes rent expense associated with our triple net operating leases, we believe Adjusted EBITDA is useful as a supplemental measure in evaluating the performance of our consolidated results of operations.

Adjusted EBITDA has economic substance because it is used by management as a performance measure to analyze the performance of our business, and is especially relevant in evaluating large, long-lived casino-hotel projects because it provides a perspective on the current effects of operating decisions separated from the substantial non-operational depreciation charges and financing costs of such projects. We present Adjusted EBITDA because it is used by some investors and creditors as an indicator of the strength and performance of ongoing business operations, including our ability to service debt, and to fund capital expenditures, acquisitions, and operations. These calculations are commonly used as a basis for investors, analysts and credit rating agencies to evaluate and compare operating performance and value companies within our industry. In order to view the operations of their casinos on a more stand-alone basis, gaming companies, including us, have historically excluded from their Adjusted EBITDA calculations certain corporate expenses that do not relate to the management of specific casino properties. However, Adjusted EBITDA is not a measure of performance or liquidity calculated in accordance with GAAP. Adjusted EBITDA information is presented as a supplemental disclosure, as management believes that it is a commonly used measure of performance in the gaming industry and that it is considered by many to be a key indicator of the Company's operating results.

We define Adjusted EBITDAR as Adjusted EBITDA (as defined above) plus rent expense associated with triple net operating leases (which is a normal, recurring cash operating expense necessary to operate our business). Adjusted EBITDAR is presented on a consolidated basis outside the financial statements solely as a valuation metric. Management believes that Adjusted EBITDAR is an additional metric traditionally used by analysts in valuing gaming companies subject to triple net leases since it eliminates the effects of variability in leasing methods and capital structures. This metric is included as a supplemental disclosure because (i) we believe Adjusted EBITDAR is traditionally used by gaming operator analysts and investors to determine the equity value of gaming operators and (ii) Adjusted EBITDAR is one of the metrics used by other financial analysts in valuing our business. We believe Adjusted EBITDAR is useful for equity valuation purposes because (i) its calculation isolates the effects of financing real estate; and (ii) using a multiple of Adjusted EBITDAR to calculate enterprise value allows for an adjustment to the balance sheet to recognize estimated liabilities arising from operating leases related to real estate. However, Adjusted EBITDAR when presented on a consolidated basis is not a financial measure in accordance with GAAP, and should not be viewed as a measure of overall operating performance or considered in isolation or as an alternative to net income because it excludes the rent expense associated with our triple net operating leases and is provided for the limited purposes referenced herein. Adjusted EBITDAR margin is defined as Adjusted EBITDAR on a consolidated basis

(as defined above) divided by revenues on a consolidated basis. Adjusted EBITDAR margin is presented on a consolidated basis outside the financial statements solely as a valuation metric.

Adjusted EPS is diluted earnings or loss per share adjusted to exclude gains/losses on the disposal of a business; non-cash gains/losses associated with REIT transactions; impairment losses; pre-opening expenses; debt extinguishment charges; gains/losses on the disposal of assets; foreign currency gains/losses; transaction related expenses; business interruption insurance proceeds; net gains/losses related to equity investments; and other.

Adjusted EPS is a non-GAAP measure and is presented solely as a supplemental disclosure to reported GAAP measures because management believes this measure is useful in providing period-to-period comparisons of the results of the Company's operations to assist investors in reviewing the Company's operating performance over time. Management believes it is useful to exclude certain items when comparing current performance to prior periods because these items can vary significantly depending on specific underlying transactions or events. Further, management believes certain excluded items may not relate specifically to current operating trends or be indicative of future results. Adjusted EPS should not be construed as an alternative to GAAP earnings per share as an indicator of the Company's performance.

We calculate Traditional net debt as Total traditional debt, which is the principal amount of debt outstanding (excludes the financing obligation associated with cash proceeds received and non-cash interest on certain claims of which the principal repayment is contingent) less Cash and cash equivalents. Management believes that Traditional net debt is an important measure to monitor leverage and evaluate the balance sheet. With respect to Traditional net debt, Cash and cash equivalents are subtracted from the GAAP measure because they could be used to reduce the Company's debt obligations. A limitation associated with using Traditional net debt is that it subtracts Cash and cash equivalents and therefore may imply that there is less Company debt than the most comparable GAAP measure indicates. Management believes that investors may find it useful to monitor leverage and evaluate the balance sheet.

The Company's Traditional net leverage ratio is defined as Traditional net debt (as defined above) divided by Adjusted EBITDAR (as defined above) for the trailing twelve months less cash rent payments to REIT landlords for the trailing twelve months. Management believes this measure is useful as a supplemental measure and provides an indication of the results generated by the Company in relation to its level of indebtedness with the cash generated from Company operations.

The Company's Lease-adjusted net leverage ratio's numerator is calculated as cash rent payments to REIT landlords for the trailing twelve months capitalized at 8 times plus Traditional net debt (as defined above). The Company's Lease-adjusted net leverage ratio's denominator is Adjusted EBITDAR (as defined above) for the trailing twelve months. Management believes this measure is useful as a supplemental measure and provides an indication of the results generated by the Company in relation to its level of indebtedness (including leases) with the cash generated from Company operations.

Each of these non-GAAP financial measures is not calculated in the same manner by all companies and, accordingly, may not be an appropriate measure of comparing performance among different companies. See the tables above, which present reconciliations of these measures to the GAAP equivalent financial measures.
